# PART 1, FEBRUARY, 1979

VIROLOGY: PAGE

S. G. BROWN, P. G. PARSONS AND J. H. POPE: Search for human tumour viruses by transfection: uptake of melanoma and Epstein-Barr virus DNA by human cells - - - - - - - - - - - - - - - 1

PARASITOLOGY:

EMANUELA HANDMAN, RHODRI CEREDIG AND GRAHAM F. MITCHELL: Murine cutaneous leishmaniasis: disease patterns in intact and nude mice of various genotypes and examination of some differences between normal and infected macrophages - - - - - - - - - - - - - - 9

PHARMACOLOGY:

G. W. LANIGAN, A. L. PAYNE AND P. A. COCKRUM: Production of tremorgenic toxins by *Penicillium janthinellum* Biourge: a possible aetiological factor in ryegrass staggers - - - - - - - - - - - - - - - 31

BIOLOGY:

*Brief Communication:—*

P. LEPPARD, I. FARIS, G. G. JAMIESON AND J. LUDBROOK: A method for the analysis of sigmoid stimulus-response curves - - - - - - - 39

BIOCHEMISTRY:

B. J. RICHARDSON, B. INGLIS, W. E. POOLE AND B. ROLFE: Galactose-1 phosphate uridyl transferase deficiency in the western grey kangaroo (*Macropus fulinginosus*; marsupialia): a model system for gene therapy studies - - - - - - - - - - - - - - - - 43

JOSEPH BERTOLINI AND JOHN R. L. MASAREI: The binding of urate by plasma proteins - - - - - - - - - - - - - - - - 51

IMMUNOLOGY:

D. J. HORSFALL AND D. ROWLEY: A comparison of methods for measuring intestinal antibodies against *Vibrio cholerae* in mice - - - - - - 61

D. J. HORSFALL AND D. ROWLEY: Intestinal antibody to *Vibrio cholerae* in immunised mice - - - - - - - - - - - - - - - 75

A. C. JOHNSTONE, K. M. MORIARTY AND B. W. MANKTELOW: Lymphocyte sensitization in sheep inoculated with extracts of spontaneously occurring malignant lymphomas - - - - - - - - - - - 87

P. HO AND J. HANSKY: Radioimmunoassay of secretin in serum - - - 95

J. M. OLESKE, R. B. ASHMAN, S. KOHL AND A. J. NAHMIAS: Enhancement of nitroblue tetrazolium dye reduction by leucocytes exposed to a factor released from sensitised lymphocytes - - - - - - - - - 107

## PART 2, APRIL, 1979

IMMUNOLOGY: PAGE

A. MANSOUR AND D. S. NELSON: Effect of treatment with azathioprine on the responses of rat lymphocytes to phytohaemagglutinin - - - - - 115

JAMES A. WOOLNOUGH AND KEVIN J. LAFFERTY: Generation of homogeneous populations of allospecific T cells *in vitro* - - - - - - - - - 127

*Brief Communications:—*

B. L. MUNDAY AND A. CORBOULD: Serological responses of sheep and cattle exposed to natural *Toxoplasma* infection - - - - - - - - - 141

A. W. CRIPPS, J. W. STEEL AND A. K. LASCELLES: The kinetic behaviour of radiolabelled $IgG_1$ derived from different sources in adult sheep and neonatal lambs - - - - - - - - - - - - - - - - 147

VIROLOGY:

MARGARET POLLETT, J. S. MACKENZIE AND K. J. TURNER: The effect of protein-deprivation on the susceptibility to influenza virus infection: a murine model system - - - - - - - - - - - - - - - 151

BIOCHEMISTRY:

P. G. PARSONS AND S. G. BROWN: Cytotoxicity studies of human melanoma cells and fibroblasts - - - - - - - - - - - - - - - 161

A. M. ROFE, R. A. J. CONYERS, R. BAIS AND J. B. EDWARDS: Oxalate excretion in rats injected with xylitol or glycollate: stimulation by phenobarbitone pre-treatment - - - - - - - - - - - - - - - - 171

PARASITOLOGY:

PHILIP T. DURFEE AND PAUL J. A. PRESIDENTE: A serological survey of Australian wildlife for antibodies to leptospires of the Hebdomadis serogroup - - - - - - - - - - - - - - - - - 177

PHILIP T. DURFEE AND PAUL J. A. PRESIDENTE: A sero-epidemiological study of *Leptospira interrogans* serovar *balcanica* in four brush-tailed possum populations in Victoria, Australia - - - - - - - - - - - 191

PHARMACOLOGY:

J. B. FURNESS, M. COSTA, R. A. RUSH AND L. B. GEFFEN: Noradrenergic transmission in isolated guinea-pig intestine following *in vivo* administration of antibodies to dopamine $\beta$-hydroxylase - - - - - - - 203

PATHOLOGY:

D. S. PETTERSON, R. M. HOWLETT, T. A. ROBERTSON AND J. M. PAPADIMITRIOU: Alteration in cell division, morphology and motility induced by the toxic principle of lupinosis - - - - - - - - 211

W. F. CAREY AND P. HÖSLI: Inhibition of Tamm-Horsfall glycoprotein induction of alkaline phosphatase in cystic fibrosis fibroblasts by medium conditioned by normal cells - - - - - - - - - - - 225

## PART 3, JUNE, 1979

PAGE

PARASITOLOGY:

PHILIP T. DURFEE AND PAUL J. A. PRESIDENTE: Experimental infections of brush-tailed possums, common wombats and water rats with *Leptospira interrogans* serovars *balcanica* and *hardjo* - - - - - - - - - 231

*Brief Communication:—*

S. R. DAS, P. DAS AND G. P. RAI: Revival of pathogenicity of axenically grown *Entamoeba histolytica* for the rat - - - - - - - - - - - 241

BIOCHEMISTRY:

S. D'SOUZA AND R. ANANTHAKRISHNAN: Affinity chromatography in the separation of human alpha$_1$-antitrypsin ($a_1$-AT) and antithrombin-III (AT-III) - - - - - - - - - - - - - - - - - - 245

G. H. MCINTOSH, G. B. BELLING AND FELICIA H. BULMAN: Experimental oxalate urolith formation in rats - - - - - - - - - - - 251

*Brief Communication:—*

BRUCE HENDERSON, MICHAEL COATES, BERNADINE BRIMHALL AND JUDITH THOMPSON: The amino acid composition of $\alpha$T-13 of globin from a pure bred dingo (*Canis familiaris dingo*) - - - - - - - - - - 261

PHARMACOLOGY:

*Brief Communication:—*

A. FOLDES: Stimulated efflux of tritiated noradrenaline and its metabolites from rabbit ear arteries—inhibition by histamine - - - - - - - 265

IMMUNOLOGY:

D. J. HORSFALL, M. A. BROWN AND D. ROWLEY: The suppressive effect of circulating specific antibody on the response to oral immunisation with *Vibrio cholerae* - - - - - - - - - - - - - - - - 271

J. MCA. COOPER AND D. ROWLEY: Clearance of bacteria from lungs of mice after opsonising with IgG or IgA - - - - - - - - - - - 279

GRAHAM F. MITCHELL, KATHY M. CRUISE, COLIN B. CHAPMAN, ROBIN F. ANDERS AND MAUREEN C. HOWARD: Hybridoma antibody immunoassays for the detection of parasitic infection: development of a model system using a larval cestode infection in mice - - - - - - - - - 287

H. WATANABE, MARGARET POLLETT AND J. S. MACKENZIE: Purification of antibodies to influenza A virus structural proteins by affinity chromatography, and their participation in haemagglutination-inhibition, neutralization and enzyme-linked immunosorbent assay - - - - - 303

L. D. BLOOM AND D. ROWLEY: Local immune response in mice to *Vibrio cholerae* - - - - - - - - - - - - - - - - - 313

L. BLOOM AND D. ROWLEY: Persistence in the mouse gut as an important factor in oral immunogenicity of strains of *V. cholerae* - - - - - - - 325

B. J. FEERY, H. A. GALLICHIO, S. J. RODDA AND A. W. HAMPSON: Antibody responses to influenza vaccines containing A/USSR/90/77 - - - - 335

## PART 4, AUGUST, 1979

PAGE

INDEX OF SUBSCRIBERS - - - - - - - - - - - - - - - 345

BIOCHEMISTRY:

R. J. HOWARD, P. M. SMITH AND G. F. MITCHELL: Optimal conditions for lactoperoxidase catalyzed radioiodination of external proteins on mouse erythrocytes - - - - - - - - - - - - - - - 355

IMMUNOLOGY:

COLIN B. CHAPMAN, PAUL M. KNOPF, J. DOUGLAS HICKS AND GRAHAM F. MITCHELL: $IgG_1$ hypergammaglobulinaemia in chronic parasitic infections in mice: magnitude of the response in mice infected with various parasites - - - - - - - - - - - - - - - 369

COLIN B. CHAPMAN, PAUL M. KNOPF, ROBIN F. ANDERS AND GRAHAM F. MITCHELL: $IgG_1$ hypergammaglobulinaemia in chronic parasitic infections in mice: evidence that the response reflects chronicity of antigen exposure - - - - - - - - - - - - - - - 389

J. G. TEW, T. E. MANDEL AND G. A. MILLER: Immune retention: immunological requirements for maintaining an easily degradable antigen *in vivo* - - - - - - - - - - - - - - - 401

VIROLOGY:

P. J. K. DURHAM AND G. W. BURGESS: Biophysical and serological characteristics of some New Zealand bovine enteroviruses - - - - 415

*Brief Communication*:—

MONTO HO AND ROBERT B. ASHMAN: Development *in vitro* of cytotoxic lymphocytes against murine cytomegalovirus - - - - - - - - - 425

PATHOLOGY:

B. H. TOH, V. B. RANDELL AND S. S. PRIME: Concanavalin A surface receptors and cytoplasmic actin in cell adhesion - - - - - - - - - - 429

PHARMACOLOGY:

*Brief Communication*:—

B. R. FROST, D. B. FREWIN AND J. A. DOWNEY: Vascular effects of etilefrine. Further studies to substantiate the predominant indirect sympathomimetic action of this agent - - - - - - - - - - - - - - 443

## PART 5, OCTOBER, 1979

PAGE

PARASITOLOGY:

PHILIP T. DURFEE AND PAUL J. A. PRESIDENTE: Experimental infection of calves and sheep with *Leptospira interrogans* serovar *balcanica* - - 447

*Brief Communication*:—

RUSSELL J. HOWARD AND GRAHAM F. MITCHELL: Accelerated clearance of uninfected red cells from *Plasmodium berghei*-infected mouse blood in normal mice - - - - - - - - - - - - - - - - 455

IMMUNOLOGY:

S. J. PROWSE, P. L. EY AND C. R. JENKIN: Alternative pathway activation of complement by a murine parasitic nematode (*Nematospiroides dubius*) - 459

JAMES A. WOOLNOUGH, IHOR S. MISKO AND KEVIN J. LAFFERTY: Cytotoxic and proliferative lymphocyte responses to allogeneic and xenogeneic antigens *in vitro* - - - - - - - - - - - - - - - - 467

PAUL M. BOLTON, SYLVIA M. KIROV AND K. J. DONALD: The effects of major and minor trauma on lymphocyte kinetics in mice - - - - - - 479

*Brief Communication*:—

LOUIS V. CASO: Histochemical studies of mucosubstances and keratins of thymic corpuscles- - - - - - - - - - - - - - - 493

VIROLOGY:

B. H. KAY: Seasonal abundance of *Culex annulirostris* and other mosquitoes at Kowanyama, north Queensland, and Charleville, south west Queensland - - - - - - - - - - - - - - - - 497

R. L. DOHERTY, J. G. CARLEY, B. H. KAY, CHERYL FILIPPICH, ELIZABETH N. MARKS AND CHRISTINA L. FRAZIER: Isolation of virus strains from mosquitoes collected in Queensland, 1972-1976 - - - - - - - 509

MICROBIOLOGY:

MARK X. TRISCOTT AND G. H. C. DAVIS: A comparison of four methods for the serotyping of group B streptococci - - - - - - - - - - 521

BIOCHEMISTRY:

BARBARA A. MAGEE, NICHOLAS POTEZNY, ALLAN M. ROFE AND ROBERT A. J. CONYERS: The inhibition of malignant cell growth by ketone bodies - - 529

PATHOLOGY:

MARGARET ROSE AND JOHN M. HAM: The biliary excretion of sulfbromophthalein in the pig - - - - - - - - - - - - - - 541

*Brief Communication*:—

N. S. VAN DE WATER, R. D. JCLLY AND B. R. H. FARROW: Canine Gaucher disease—the enzymic defect - - - - - - - - - - - - - 551

PHARMACOLOGY:

J. A. YOUNG, D. I. COOK, G. JONES, J. MCGIRR AND C. THOMPSON: The effect of phenylephrine on excretion of fluid and electrolytes by the parotid and mandibular glands of the rat - - - - - - - - - - - - - 555

## PART 6, DECEMBER, 1979

BIOCHEMISTRY: PAGE

S. G. SMELLIE AND P. G. PARSONS: Effects of thymidine analogues on murine and human cells - - - - - - - - - - - - - - - 563

JACK HANSKY AND PATRICIA HO: Cholecystokinin-like peptides in brain and intestine of obese-hyperglycaemic mice - - - - - - - - 575

VIROLOGY:

*Brief Communication*:—

T. D. ST. GEORGE, D. H. CYBINSKI, CHERYL FILIPPICH AND J. G. CARLEY: The isolation of three simbu group viruses new to Australia - - - - - 581

M. SMITH AND S. TZIPORI: Gel electrophoresis of rotavirus RNA derived from six different animal species - - - - - - - - - - - - 583

IMMUNOLOGY:

GRAEME J. FINLAY, ROGER J. BOOTH AND JOHN MARBROOK: Antibody responses of human lymphocytes *in vitro*. Specificity and physical properties of plaque-forming cell precursors - - - - - - - - 587

GRAEME J. FINLAY, ROGER J. BOOTH AND JOHN MARBROOK: Antibody responses of human lymphocytes *in vitro*. Enhancing effects of hydrocortisone - - - - - - - - - - - - - - - - - - 597

P. J. DARTON AND G. H. MCDOWELL: The effect of oestrogen on selective transfer of $IgG_1$ into mammary secretion of ewes - - - - - - 617

HELEN C. O'NEILL AND R. V. BLANDEN: Variation in H-2 antigen expression in $F_1$ hybrid mice: analysis using monoclonal antibodies - - - - - 627

*Brief Communication*:—

L. K. ASHMAN AND I. KOTLARSKI: Inhibition of the growth of Lewis lung carcinoma in syngeneic mice by *Salmonella* antigens - - - - - - 637

PARASITOLOGY:

PAUL M. KNOPF, GRAHAM V. BROWN, RUSSELL J. HOWARD AND GRAHAM F. MITCHELL: Immunoprecipitation of biosynthetically-labelled products in the identification of antigens of murine red cells infected with the protozoan parasite, *Plasmodium berghei* - - - - - - - - - 603

PHYSIOLOGY:

ANDREW J. PATERSON AND MILTON T. W. HEARN: Fused rocket immunoelectrophoretic analysis of human and sheep thyroglobulins purified by gel chromatography - - - - - - - - - - - - - - - 641

# SUBJECT INDEX

**BIOCHEMISTRY**

Alpha$_1$-antitrypsin, *see* Antitrypsin, alpha$_1$.
Alpha T-13, *see* T-13, $\alpha$.
Amino acid composition of $\alpha$T-13 of globin from a pure bred dingo (*Canis familiaris dingo*) (Henderson, Coates, Brimhall and Thompson), 261.
Antitrypsin, alpha$_1$-, ($\alpha_1$-AT) and antithrombin-III (AT-III), human, affinity chromatography in the separation of (D'Souza and Ananthakrishnan), 245.
Brain and intestine of obese-hyperglycaemic mice, cholecystokinin-like peptides in (Hansky and Ho), 575.
*Canis familiaris dingo*, *see* Dingo.
Cholecystokinin-like peptides in brain and intestine of obese-hyperglycaemic mice (Hansky and Ho), 575.
Cytotoxicity studies of human melanoma cells and fibroblasts (Parsons and Brown), 161.
Dingo (*Canis familiaris dingo*), pure bred, the amino acid composition of $\alpha$T-13 of globin from a (Henderson, Coates, Brimhall and Thompson), 261.
Galactose-1 phosphate uridyl transferase deficiency in the western grey kangaroo (*Macropus fulinginosus*; marsupialia): a model system for gene therapy studies (Richardson, Inglis, Poole and Rolfe), 43.
Kangaroo, western grey, *see Macropus fulinginosus*; marsupialia.
Ketone bodies, the inhibition of malignant cell growth by (Magee, Potezny, Rofe and Conyers), 529.
Lactoperoxidase catalyzed radioiodination of external proteins on mouse erythrocytes, optimal conditions for (Howard, Smith and Mitchell), 355.
*Macropus fulinginosus*; marsupialia, western grey kangaroo, galactose-1 phosphate uridyl transferase deficiency in the; a model system for gene therapy studies (Richardson, Inglis, Poole and Rolfe), 43.
Malignant cell growth, the inhibition of, by ketone bodies (Magee, Potezny, Rofe and Conyers), 529.
Melanoma cells, human, and fibroblasts, cytotoxicity studies of (Parsons and Brown), 161.
Obese-hyperglycaemic mice, cholecystokinin-like peptides in brain and intestine of (Hansky and Ho), 575.
Oxalate excretion in rats injected with xylitol or glycollate: stimulation by phenobarbitone pre-treatment (Rofe, Conyers, Bais and Edwards), 171.
Oxalate urolith formation, experimental, in rats (McIntosh, Belling and Bulman), 251.
Phenobarbitone pre-treatment, stimulation by: oxalate excretion in rats injected with xylitol or glycollate (Rofe, Conyers, Bais and Edwards), 171.
Plasma proteins, the binding of urate by (Bertolini and Masarei), 51.
Proteins, external, on mouse erythrocytes, optimal conditions for lactoperoxidase catalyzed radioiodination of (Howard, Smith and Mitchell), 355.
T-13, $\alpha$, of globin from a pure bred dingo (*Canis familiaris dingo*), the amino acid composition of (Henderson, Coates, Brimhall and Thompson), 261.
Thymidine analogues, effects of, on murine and human cells (Smellie and Parsons), 563.
Urate, the binding of, by plasma protein (Bertolini and Masarei), 51.
Urolith, oxalate, *see* Oxalate urolith.
Xylitol or glycollate, oxalate excretion in rats injected with: stimulation by phenobarbitone pre-treatment (Rofe, Conyers, Bais and Edwards), 171.

**BIOLOGY**

Stimulus-response curves, sigmoid, a method for the analysis of (Leppard, Faris, Jamieson and Ludbrook), 39.

**IMMUNOLOGY**

A/USSR/90/77, antibody responses to influenza vaccines containing (Feery, Gallichio, Rodda and Hampson), 335.
Alloreactive T cells, *see* T cells, alloreactive.
Antibodies, intestinal, *see* Intestinal antibodies.
Antibodies to influenza A virus structural proteins, purification of, by affinity chromatography, and their participation in haemagglutination-inhibition, neutralization and enzyme-linked immunosorbent assay (Watanabe, Pollett and Mackenzie), 303.
Antibody, circulating specific, the suppressive effect of, on the response to oral immunisation with *Vibrio cholerae* (Horsfall, Brown and Rowley), 271.
Antibody immunoassays, hybridoma, for the detection of parasitic infection: development of a model system using a larval cestode infection in mice (Mitchell, Cruise, Chapman, Anders and Howard), 287.
Antibody responses of human lymphocytes *in vitro*. Enhancing effects of hydrocortisone (Finlay, Booth and Marbrook), 597.

Antibody responses of human lymphocytes *in vitro*. Specificity and physical properties of plaque-forming cell precursors (Finlay, Booth and Marbrook), 587.

Antibody responses to influenza vaccines containing A/USSR/90/77 (Feery, Gallichio, Rodda and Hampson), 335.

Antigen, H-2, *see* H-2 antigen.

Antigens, allogeneic and xenogeneic, cytotoxic and proliferative lymphocyte responses to, *in vitro* (Woolnough, Misko and Lafferty), 467.

Antigens of murine red cells infected with the protozoan parasite, *Plasmodium berghei*, immunoprecipitation of biosynthetically-labelled products in the identification of (Knopf, Brown, Howard and Mitchell), 603.

Azathioprine, effect of treatment with, on the responses of rat lymphocytes to phytohaemagglutinin (Mansour and Nelson), 115.

Bacteria, clearance of, from lungs of mice after opsonising with IgG or IgA (Cooper and Rowley), 279.

Carcinoma, Lewis lung, *see* Lewis lung carcinoma.

Complement, alternative pathway activation of, by a murine parasitic nematode (*Nematospiroides dubius*) (Prowse, Ey and Jenkin), 459.

$F_1$ hybrid mice, variation in H-2 antigen expression in: analysis using monoclonal antibodies (O'Neill and Blanden), 627.

H-2 antigen expression in $F_1$ hybrid mice, variation in: analysis using monoclonal antibodies (O'Neill and Blanden), 627.

Histochemical studies of mucosubstances and keratins of thymic corpuscles (Caso), 493.

Hybridoma antibody immunoassays, *see* Antibody immunoassays, hybridoma.

Hydrocortisone, enhancing effects of. Antibody responses of human lymphocytes *in vitro* (Finlay, Booth and Marbrook), 597.

Hypergammaglobulinaemia, $IgG_1$, in chronic parasitic infections in mice: evidence that the response reflects chronicity of antigen exposure (Chapman, Knopf, Anders and Mitchell), 389.

Hypergammaglobulinaemia, $IgG_1$, in chronic parasitic infections in mice: magnitude of the response in mice infected with various parasites (Chapman, Knopf, Hicks and Mitchell), 369.

$IgG_1$, radiolabelled, derived from different sources in adult sheep and neonatal lambs, the kinetic behaviour of (Cripps, Steel and Lascelles), 147.

$IgG_1$, the effect of oestrogen on selective transfer of, into mammary secretion of ewes (Darton and McDowell), 617.

Immune response, local, in mice to *Vibrio cholerae* (Bloom and Rowley), 313.

Immune retention: immunological requirements for maintaining an easily degradable antigen *in vivo* (Tew, Mandel and Miller), 401.

Immunisation, oral, with *Vibrio cholerae*, the suppressive effect of circulating specific antibody on the response to (Horsfall, Brown and Rowley), 271.

Immunogenicity, oral, of strains of *V. cholerae*, persistence in the mouse gut as an important factor in (Bloom and Rowley), 325.

Immunoprecipitation of biosynthetically-labelled products in the identification of antigens of murine red cells infected with the protozoan parasite, *Plasmodium berghei* (Knopf, Brown, Howard and Mitchell), 603.

Influenza A virus structural proteins, purification of antibodies to, by affinity chromatography, and their participation in haemagglutination-inhibition, neutralization and enzyme-linked immunosorbent assay (Watanabe, Pollett and Mackenzie), 303.

Influenza vaccines containing A/USSR/90/77, antibody responses to (Feery, Gallichio, Rodda and Hampson), 335.

Intestinal antibodies against *Vibrio cholerae* in mice, a comparison of methods for measuring (Horsfall and Rowley), 61.

Intestinal antibody to *Vibrio cholerae* in immunised mice (Horsfall and Rowley), 75.

Keratins, and mucosubstances, of thymic corpuscles, histochemical studies of (Caso), 493.

Leucocytes exposed to a factor released from sensitised lymphocytes, enhancement of nitro-blue tetrazolium dye reduction by (Oleske, Ashman, Kohl and Nahmias), 107

Lewis lung carcinoma, inhibition of the growth of, in syngeneic mice, by *Salmonella* antigens (Ashman and Kotlarski), 637.

Lungs of mice, clearance of bacteria from, after opsonising with IgG or IgA (Cooper and Rowley), 279.

Lymphocyte kinetics in mice, the effects of major and minor trauma on (Bolton, Kirov and Donald), 479.

Lymphocyte responses, cytotoxic and proliferative, to allogeneic and xenogeneic antigens *in vitro* (Woolnough, Misko and Lafferty), 467.

Lymphocyte sensitization in sheep inoculated with extracts of spontaneously occurring malignant lymphomas (Johnstone, Moriarty and Manktelow), 87.

Lymphocytes, human, antibody responses of, *in vitro*. Enhancing effects of hydrocortisone (Finlay, Booth and Marbrook), 597.

Lymphocytes, human, antibody responses of, *in vitro*. Specificity and physical properties of plaque-forming cell precursors (Finlay, Booth and Marbrook), 587.

Lymphocytes, rat, effect of treatment with azathioprine on the responses of, to phytohaemagglutinin (Mansour and Nelson), 115.

Lymphomas, malignant, spontaneously occurring, lymphocyte sensitization in sheep inoculated with extracts of (Johnstone, Moriarty and Manktelow), 87.

Mammary secretion of ewes, the effect of oestrogen on selective transfer of $IgG_1$ into (Darton and McDowell), 617.

Mice, $F_1$ hybrid, *see* $F_1$ hybrid mice.

*Nematospiroides dubius*, a murine parasitic nematode, alternative pathway activation of complement by (Prowse, Ey and Jenkin), 459.

Nitroblue tetrazolium dye reduction, enhancement of, by leucocytes exposed to a factor released from sensitised lymphocytes (Oleske, Ashman, Kohl and Nahmias), 107.

Oestrogen, the effect of, on selective transfer $IgG_1$ into mammary secretion of ewes (Darton and McDowell), 617.

Oral immunisation, *see* Immunisation, oral.

Oral immunogenicity, *see* Immunogenicity, oral.

Parasitic infection, hybridoma, antibody immunoassays for the detection of: development of a model system using a larval cestode infection in mice (Mitchell, Cruise, Chapman, Anders and Howard), 287.

Parasitic infections in mice, chronic, $IgG_1$ hypergammaglobulinaemia in: evidence that the response reflects chronicity of antigen exposure (Chapman, Knopf, Anders and Mitchell), 389.
Parasitic infections in mice, chronic, $IgG_1$ hypergammaglobulinaemia in: magnitude of the response in mice infected with various parasites (Chapman, Knopf, Hicks and Mitchell), 369.
*Plasmodium berghei*, immunoprecipitation of biosynthetically-labelled products in the identification of antigens of murine red cells infected with the protozoan parasite (Knopf, Brown, Howard and Mitchell), 603.
*Salmonella* antigens, inhibition of the growth of Lewis lung carcinoma in syngeneic mice by (Ashman and Kotlarski), 637.
Secretin in serum, radioimmunoassay of (Ho and Hansky), 95.
Sheep, adult, and neonatal lambs, the kinetic behaviour of radiolabelled $IgG_1$ derived from different sources in (Cripps, Steel and Lasceiles), 147.
Sheep and cattle exposed to natural *Toxoplasma* infection, serological responses of (Munday and Corbould), 141.
T cells, alloreactive, generation of homogeneous populations of, *in vitro* (Woolnough and Lafferty), 127.
Thymic corpuscles, histochemical studies of mucosubstances and keratins of (Caso), 493.
*Toxoplasma* infection, natural, serological responses of sheep and cattle exposed to (Munday and Corbould), 141.
Trauma, major and minor, the effects of, on lymphocyte kinetics in mice (Bolton, Kirov and Donald), 479.
*Vibrio cholerae* in immunised mice, intestinal antibody to (Horsfall and Rowley), 75.
*Vibrio cholerae* in mice, a comparison of methods for measuring intestinal antibodies against (Horsfall and Rowley), 61.
*Vibrio cholerae*, local immune response in mice to (Bloom and Rowley), 313.
*V. cholerae*, persistence in the mouse gut as an important factor in oral immunogenicity of strains of (Bloom and Rowley), 325.
*Vibrio cholerae*, the suppressive effect of circulating specific antibody on the response to oral immunisation with (Horsfall, Brown and Rowley), 271.

## MICROBIOLOGY

Streptococci, group B, a comparison of four methods for the serotyping of (Triscott and Davis), 521.

## PARASITOLOGY

Australian Wildlife, *see* Wildlife, Australian.
Calves and sheep, experimental infection of, with *Leptospira interrogans* serovar *balcanica* (Durfee and Presidente), 447.
*Entamoeba histolytica*, axenically grown, revival of pathogenicity of, for the rat (Das, Das and Rai), 241.
Leishmaniasis, murine cutaneous: disease patterns in intact and nude mice of various genotypes and examination of some differences between normal and infected macrophages (Handman, Ceredig and Mitchell), 9.
*Leptospira interrogans* serovar *balcanica*, a sero-epidemiological study of, in four brush-tailed possum populations in Victoria, Australia (Durfee and Presidente), 191.
*Leptospira interrogans* serovar *balcanica*, experimental infection of calves and sheep with (Durfee and Presidente), 447.
*Leptospira interrogans* serovars *balcanica* and *hardjo*, experimental infections of brush-tailed possums, common wombats and water rats with (Durfee and Presidente), 231.
Leptospires of the Hebdomadis serogroup, a serological survey of Australian wildlife for antibodies to (Durfee and Presidente), 177.
*Plasmodium berghei*-infected mouse blood, accelerated clearance of uninfected red cells from, in normal mice (Howard and Mitchell), 455.
Possum populations, four brush-tailed, in Victoria, Australia, a sero-epidemiological study of *Leptospira interrogans* serovar *balcanica* in (Durfee and Presidente), 191.
Possums, brush-tailed, common wombats and water rats, experimental infections of, with *Leptospira interrogans* serovars *balcanica* and *hardjo* (Durfee and Presidente), 231.
Rat, revival of pathogenicity of axenically grown *Entamoeba histolytica* for the (Das, Das and Rai), 241.
Wildlife, Australian, a serological survey of, for antibodies to leptospires of the Hebdomadis serogroup (Durfee and Presidente), 177.

## PATHOLOGY

Actin, cytoplasmic, and concanavalin A surface receptors, in cell adhesion (Toh, Randell and Prime), 429.
Alkaline phosphatase in cystic fibrosis fibroblasts, inhibition of Tamm-Horsfall glycoprotein induction of, by medium conditioned by normal cells (Carey and Hösli), 225.
Biliary excretion of sulfbromophthalein in the pig (Rose and Ham), 541.
Canine Gaucher disease, *see* Gaucher disease, canine.
Cell division, morphology and motility, alteration in, induced by the toxic principle of lupinosis (Petterson, Howlett, Robertson and Papadimitriou), 211.
Concanavalin A surface receptors and cytoplasmic actin in cell adhesion (Toh, Randell and Prime), 429.
Cystic fibrosis fibroblasts, inhibition of Tamm-Horsfall glycoprotein induction of alkaline phosphatase in, by medium conditioned by normal cells (Carey and Hösli), 225.
Gaucher disease, canine—the enzymic defect (Van De Water, Jolly and Farrow), 551.
Lupinosis, the toxic principle of, alteration of cell division, morphology and motility induced by (Petterson, Howlett, Robertson and Papadimitriou), 211.
Sulfbromophthalein in the pig, the biliary excretion of (Rose and Ham), 541.
Tamm-Horsfall glycoprotein induction of alkaline phosphatase in cystic fibrosis fibroblasts, inhibition of, by medium conditioned by normal cells (Carey and Hösli), 225.

## PHARMACOLOGY

Antibodies to dopamine $\beta$-hydroxylase, noradrenergic transmission in isolated guinea-pig intestine following *in vivo* administration of (Furness, Costa, Rush and Geffen), 203.

Etilefrine, vascular effects of. Further studies to substantiate the predominant indirect sympathomimetic action of this agent (Frost, Frewin and Downey), 443.

Fluid and electrolytes, the effect of phenylephrine on excretion of, by the parotid and mandibular glands of the rat (Young, Cook, Jones, McGirr and Thompson), 555.

Noradrenaline, tritiated, and its metabolites, stimulated efflux of, from rabbit ear arteries—inhibition by histamine (Foldes), 265.

Noradrenergic transmission in isolated guinea-pig intestine following *in vivo* administration of antibodies to dopamine $\beta$-hydroxylase (Furness, Costa, Rush and Geffen), 203.

Parotid and mandibular glands of the rat, the effect of phenylephrine on excretion of fluid and electrolytes by the (Young, Cook, Jones, McGirr and Thompson), 555.

*Penicillium janthinellum* Biourge, production of tremorgenic toxins by: a possible aetiological factor in ryegrass staggers (Lanigan, Payne and Cockrum), 31.

Phenylephrine, the effect of, on excretion of fluid and electrolytes by the parotid and mandibular glands of the rat (Young, Cook, Jones, McGirr and Thompson), 555.

Tremorgenic toxins, production of, by *Penicillium janthinellum* Biourge: a possible aetiological factor in ryegrass staggers (Lanigan, Payne and Cockrum), 31.

Vascular effects of etilefrine. Further studies to substantiate the predominant indirect sympathomimetic action of this agent (Frost, Frewin and Downey), 443.

## PHYSIOLOGY

Thyroglobulins, human and sheep, purified by gel chromatography, fused rocket immunoelectrophoretic analysis of (Paterson and Hearn), 641.

## SUBSCRIBERS

Subscribers, index of, 345.

## VIROLOGY

Bovine enteroviruses, some New Zealand, biophysical and serological characteristics of (Durham and Burgess), 415.

*Culex annulirostris* and other mosquitoes, seasonal abundance of, at Kowanyama, north Queensland, and Charleville, south west Queensland (Kay), 497.

Cytomegalovirus, murine, development *in vitro* of cytotoxic lymphocytes against (Ho and Ashman), 425.

Influenza virus infection, the effect of protein-deprivation on the susceptibility to: a murine model system (Pollett, Mackenzie and Turner), 151.

Lymphocytes, cytotoxic, development *in vitro* of, against murine cytomegalovirus (Ho and Ashman), 425.

Mosquitoes collected in Queensland, 1972-1976, isolation of virus strains from (Doherty, Carley, Kay, Filippich, Marks and Frazier), 509.

Mosquitoes, other, and *Culex annulirostris*, seasonal abundance of, at Kowanyama, north Queensland, and Charleville, south west Queensland (Kay), 497.

Protein-deprivation, the effect of, on the susceptibility to influenza virus infection: a murine model system (Pollett, Mackenzie and Turner), 151.

Rotavirus RNA derived from six different animal species, gel electrophoresis of (Smith and Tzipori), 583.

Simbu group viruses, the isolation of three, new to Australia (St. George, Cybinski, Filippich and Carley), 581.

Transfection, search for human tumour viruses by: uptake of melanoma and Epstein-Barr virus DNA by human cells (Brown, Parsons and Pope), 1.

Virus strains, isolation of, from mosquitoes collected in Queensland, 1972-1976 (Doherty, Carley, Kay, Filippich, Marks and Frazier), 509.

Viruses, simbu group, *see* Simbu group viruses.
